

**Northwestern Ontario Mines & Minerals Symposium
“Beyond Superior – Explore Northwestern Ontario”**

Alteration Effects In The Proximity Of A Mineral Deposit

High concentrations of minerals are anomalous features on our landscape. This workshop will examine the physical changes that prospectors and geologists should be aware of when they are exploring the rocks and minerals in and around various mineral deposits. Alteration minerals, geochemistry and geophysical changes will be featured.

Location: Valhalla Inn

Date: Monday April 7, 2008

Time: 7:00 - 10:00 pm

Room: Viking

Cost: \$50.00

Limited to 50 participants first come basis
