

Dorothy Campbell
Director
Northwestern Ontario Prospectors Association

Dorothy Campbell has been working as District Geologist for 12 years with the Ontario Geological Survey-Resident Geologist Program. Her favourite part of this role is having the opportunity to work with many interesting and dedicated prospectors actively prospecting in the Thunder Bay South (TBS) district. The district extends from just west of Atikokan easterly to White River with the northern irregular boundary near Armstrong south to the international border between Canada and the US. Dorothy has served as treasurer for Canadian Institute of Mining, Metallurgy and Petroleum (CIM) Thunder Bay Branch for 12 years and is presently a member of Women in Mining (WIM), Northwestern Ontario Prospectors Association (NWOPA) and the Association of Professional Geoscientists of Ontario (APGO).
