

Pam Coles
Board Member
NWOPA

Pam is currently the Regional Geophysicist in Abitibi's newest office in Thunder Bay, which opened in 2013. Her area of focus is mainly Induced Potential (IP). As Regional Geophysicist she oversees client relations and projects, mainly focused in central Canada. Outside of this, she is also a Project Geophysicist (data collection, processing, interpretation and report).

Pam attended Memorial University of Newfoundland, graduating with a Bachelor of Science in Geophysics. After graduation she made the move to Val-d'Or, Quebec, and joined the Head office of Abitibi Geophysics. She remained there for two years before moving on to open the new branch in Thunder Bay.

Pam is also a contract lecturer at Lakehead University in Thunder Bay. She resides on several boards, including the North Western Ontario Prospectors Association (NWOPA) as board member, and Women in Mining North Western Ontario (WIM) as chair. She is also the Mining Day chair, which is a local event held in Thunder Bay to educate children about mining.
